CHETAN PATIL

SDET | QA Automation Engineer

Bangalore, India | patilchetan256@gmail.com | +91 8217480083 | github.com/chetan13025

PROFESSIONAL SUMMARY

SDET with 4+ years in web, mobile, API and database testing. Built a Rest Assured framework with 200+ automated API tests and API-to-DB reconciliation (MySQL, MongoDB). Automated 200+ UI tests with Selenium and Appium, cutting manual effort by 70%. Strong in Java, TestNG, Cucumber, Jenkins CI/CD and Agile delivery. Mentored two junior engineers.

KEY ACHIEVEMENTS

- Built a Rest Assured (Java) framework with **200+ automated tests across 15+ APIs**, replacing manual API regression.
- Automated **200+ UI end-to-end tests**, cutting manual testing effort by **70%**.
- Cut mobile test execution time by **60%** with parallel Appium runs across Android devices.
- Mentored **two junior engineers** and reviewed their test code.

KEY SKILLS

Automation Frameworks: Selenium WebDriver, Appium, Rest Assured, TestNG, Cucumber (BDD), Page Object Model (POM), Data-Driven and Keyword-Driven Frameworks
Programming: Core Java, Object-Oriented Programming (OOP), Java Collections, SQL
API Testing: REST API Testing, API Automation, Postman, Newman, JSON, API-DB Reconciliation
Mobile Testing: Appium, Android Automation, Cross-Device Testing, Parallel Test Execution
Database Testing: MySQL, MS SQL, MongoDB, Backend Data Validation, SQL Queries
CI/CD and Tools: Jenkins, Maven, Git, CI/CD, Extent Reports, JIRA
Testing Types: Functional, System, Integration, Smoke, Regression, Exploratory, End-to-End (E2E), Manual Testing
Process: Agile/Scrum, STLC, Defect Life Cycle Management, Test Planning, Test Case Design, Risk-Based Testing, Root Cause Analysis, Test Metrics and Reporting, Peer Code and Test Review

PROFESSIONAL EXPERIENCE

QA Engineer | Digital Harbor, Bangalore, India | 07/2025 – Present

Yoodle: Enterprise Collaboration Platform

Meetings, chat and productivity platform across web, desktop and mobile

- Designed the end-to-end UI, API and backend test strategy across 3 platforms: web, desktop and mobile.
- Executed functional, regression, integration, smoke and exploratory testing across collaboration modules, ensuring feature quality and system reliability.
- Collaborated with developers and product owners in Agile sprints to triage defects and sign off releases.

SET: Social Enterprise Technology Universal Platform

Healthcare case-management and workflow-automation platform | Rest Assured, MySQL, MongoDB, Cucumber, Jenkins

- Built a scalable REST API automation framework with Rest Assured (Java), covering 15+ APIs and 200+ automated test cases, including JSON response validation, authentication workflows and dynamic payload handling.
- Implemented automated API–DB reconciliation to validate backend data consistency across MySQL and MongoDB.
- Integrated the Cucumber (BDD) suite of 200+ tests with Jenkins and Extent Reports, replacing manual API regression with automated runs.
- Designed and executed end-to-end Web, API and Database validation strategies for backend data integrity checks.

Software Automation Engineer | Blubirch, Bangalore, India | 08/2022 – 07/2025

RA-PaaS: Returns Automation Platform as a Service

Reverse supply-chain platform liquidating returned items across B2B and B2C channels | Selenium, Appium, Postman, Newman

- Automated 200+ UI end-to-end test cases using Selenium WebDriver and Appium for critical business modules, cutting manual testing effort by 70%.
- Executed automated API test collections via Postman and Newman, generating detailed reports for stakeholders.

Remarketing: b4traders.com

Remarketing platform serving 9,000+ buyers with tracking, pricing guidance and business insights | Selenium WebDriver

- Automated 80+ UI regression test cases, streamlining login, navigation and business workflows.
- Automated data synchronization between two web applications, improving efficiency and reducing manual intervention.

FTA: Field Team Automation

Field-team mobile app for tour planning and task execution | Appium

- Automated 100+ mobile test scenarios for tour plan creation, with parallel execution across Android devices, reducing execution time by 60%.

Across Blubirch

- Maintained Selenium WebDriver/TestNG suites using the Page Object Model (POM).
- Owned QA strategy end to end: requirement analysis, test planning, risk management, JIRA defect lifecycle and stakeholder reporting.

- Mentored two junior engineers on automation best practices and reviewed their test code.
- Maintained Maven, Jenkins and Git pipelines for automated regression runs; active in daily scrums, sprint planning and retrospectives.

EDUCATION

Bachelor of Engineering (B.E.), Basaveshwar Engineering College, Bagalkot (Autonomous), Karnataka, India | 2020

CERTIFICATION

Manual, Core Java & Automation Testing, QSpiders, Bangalore, India

LANGUAGES

Kannada, English, Hindi
