CHETAN PATIL

QA Engineer | Software Automation Engineer | Test Automation Specialist
patilchetan256@gmail.com | +91 8217480083 | github.com/chetan13025

PROFESSIONAL SUMMARY

QA Automation Engineer with 4+ years in web, mobile, API and database testing. Built a Rest Assured framework with 200+ automated API tests and API-to-DB reconciliation (MySQL, MongoDB), and automated 200+ UI tests with Selenium and Appium, cutting manual effort by 70%. Strong in Java, TestNG, Cucumber, Jenkins CI/CD and Agile delivery. Mentored two junior engineers.

KEY SKILLS

Automation Frameworks: Selenium WebDriver, Appium, Rest Assured, TestNG, Page Object Model (POM), Cucumber (BDD), Data-Driven & Keyword-Driven Frameworks

Programming & Scripting: Core Java, Object-Oriented Programming (OOP), Java Collections

API & Web Services Testing: REST API Testing, API Automation, Postman, Newman, JSON, API-DB Reconciliation

Mobile Testing: Appium, Android Automation, Cross-Device Testing, Parallel Test Execution

Database Testing: MySQL, MS SQL, MongoDB, Backend Data Validation, SQL Queries

CI/CD & DevOps Tools: Jenkins, Maven, Git, CI/CD, Extent Reports

Testing Types: Manual Testing, Functional, System, Integration, Smoke, Regression, Exploratory, End-to-End (E2E) Testing

Process & Collaboration: Agile/Scrum, JIRA, STLC, Defect Life Cycle Management, Test Planning, Test Case Design & Execution, Stakeholder Communication

Quality Engineering Practices: Test Strategy & Test Plan Design, Risk-Based Testing, Root Cause Analysis, Defect Tracking & Reporting, Test Metrics & Reporting (Extent Reports), Peer Code & Test Review

PROFESSIONAL EXPERIENCE

QA Engineer — Digital Harbor, Bangalore, India

07/2025 – Present

Project 1: Yoodle — Enterprise Collaboration Platform

- Designed end-to-end UI, API and backend test strategy for a collaboration platform (meetings, chat, productivity) spanning 3 platforms: web, desktop and mobile.
- Executed functional, regression, integration, smoke and exploratory testing across collaboration modules, ensuring feature quality and system reliability.
- Collaborated with developers and product owners in Agile sprints to triage defects and sign off releases.

Project 2: SET — Social Enterprise Technology Universal Platform

- Healthcare case-management and workflow-automation platform.
- Designed and executed end-to-end Web, API, and Database validation strategies using MySQL and MongoDB for backend data integrity checks.
- Built a scalable REST API automation framework with Rest Assured (Java), covering 15+ APIs and 200+ automated test cases, including JSON response validation, authentication workflows, and dynamic payload handling.
- Implemented automated API–DB reconciliation to validate backend data consistency across MySQL and MongoDB.
- Integrated the Cucumber (BDD) suite of 200+ tests covering 15+ APIs with Jenkins and Extent Reports, replacing manual API regression with automated runs.

Software Automation Engineer — Blubirch, Bangalore, India

08/2022 – 07/2025

Project 1: RA–PaaS (Returns Automation Platform as a Service) — reliance.blubirch.com

- Reverse supply-chain platform liquidating returned items across B2B and B2C channels.
- Automated 200+ UI end-to-end test cases using Selenium WebDriver and Appium for critical business modules, cutting manual testing effort by 70%.
- Executed automated API test collections via Postman and Newman, generating detailed reports for stakeholders.

Project 2: Remarketing — b4traders.com

- Remarketing platform serving 9,000+ buyers with tracking, pricing guidance and business insights.
- Automated 80+ UI regression test cases with Selenium WebDriver, streamlining login, navigation, and business workflows.
- Automated data synchronization between two web applications, improving efficiency and reducing manual intervention.

Project 3: FTA (Field Team Automation) — whirlpool.blubirch.com

- Field-team mobile app for tour planning and task execution.

- Automated 100+ mobile test scenarios for tour plan creation using Appium, with parallel execution across Android devices, reducing execution time by 60%.

Key Contributions

- Built a Rest Assured (Java) API framework and maintained Selenium WebDriver/TestNG suites using the Page Object Model (POM).
- Owned QA strategy end to end: requirement analysis, test planning, risk management, JIRA defect lifecycle and stakeholder reporting.
- Mentored two junior engineers on automation best practices and reviewed their test code.
- Maintained Maven, Jenkins and Git pipelines for automated regression runs; active in daily scrums, sprint planning and retrospectives.

EDUCATION

Bachelor of Engineering (B.E.) — Basaveshwar Engineering College, Bagalkot (Autonomous), Karnataka, India | 2020

CERTIFICATION

Manual, Core Java & Automation Testing — QSpiders, Bangalore, India

LANGUAGES

Kannada, English, Hindi
